DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Applicant's remarks pages 10-12, dated 06/10/2008 with respect to claims 1,5,6,8-10,12,17,18,23,24 and 29 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonard Diana on 09/17/2008.

Regarding claim 1, "determining whether the received access information is coincident with the old access information" should read -- determining whether the received access information is coincident with the registered access information --

And "registering the access information to the registered profile list administration data in a case where the access information is new to the hold access information ..." should read -- registering the access information to the registered

profile list administration data in a case where the access information is new to the registered access information ... --

Regarding claim 6, delete "(image data is PDL code data)"

Regarding claim 10, delete "(Fig. 7: access information is displayed)."

Regarding claim 12, "... registering the access information to the registered profile list administration data in a case where the access information is new to the hold access information due to determining in said determining step." should read -- "... registering the access information to the registered profile list administration data in a case where the access information is new to the registered access information due to determining in said determining step.—

Regarding claim 18, delete "(network identifier client name latest access data/time 304-1-n-in Fig. 6B)."

Regarding claim 17, "... comprising the step of deleting the held profile based on the access information." should read -- ... comprising the step of deleting the registered profile based on the access information.—

Regarding claim 24, "...said deleting step includes deleting any of the held profiles for which the number of the client computers that have accessed that profile is lower than a predetermined threshold." should read -- ...said deleting step includes deleting any of the registered profiles for which the number of the client computers that have accessed that profile is lower than a predetermined threshold. —

Delete "(deletion protect period 300-7).."

Regarding claim 29, “ a registering unit adapted to register the access information to the registered profile list administration data in case that the access information is new to the hold access information due to determining by said determining unit.” should read -- a registering unit adapted to register the access information to the registered profile list administration data in case that the access information is new to the registered access information due to determining by said determining unit. --

Allowable Subject Matter

3. Claims 1,5,6,8-10,12,17,18,23,24 and 29 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Claims 1,12 and 29 of the current application teaches similar subject matter as the prior art of Endoh et al US 2003/0142332. However, claims 1, 12 and 29 are allowed for the reasons pointed out by Applicant's remarks pages 10-12. In particular, prior art of record fails to teach determining the received access information is coincident with the registered access information and registering the access information to the registered profile list administration data in a case where the access information is new to the registered access information due to determining in said determining step.
5. It follows that the dependent claims are inherently allowable for depending on an allowable base claim.
